

HOW TO MEASURE YOUR DOOR

We need 4 measurements: the panel area and the full door.

1 PANEL HEIGHT

Measure from the top outer edge of the raised panel area to the bottom outer edge.

2 PANEL WIDTH

Measure across the raised panel area, from the left outer edge to the right outer edge.

3 FULL DOOR HEIGHT

Measure from the very top of the door to the very bottom.

4 FULL DOOR WIDTH

Measure straight across from the hinge-side edge to the very edge on the opposite side.

TIPS

- Use a standard tape measure.
- Measure to the nearest 1/16 inch.
- Do not include the door frame.
- Send all 4 measurements.
